SMART INDIA HACKATHON 2026

SMART INDIA HACKATHON 2026

PramaanScope

Institutional evidence review with correction impact tracking

Problem Statement ID: SIH26261

Problem Statement Title

AI-Powered Application Validation, Document Authentication and Regulatory Compliance Verification

Theme: Smart Automation
PS Category: Software

Team Name: CELESTIAL_OUTLAWS

Team Leader: Akshaj Sherekar
Team ID: _____

PRAMAANSCOPE

SMART INDIA HACKATHON 2026

Evidence that applies to the right campus

Application: Campus A
Submitted certificate: Campus B

Illustrative campuses. Synthetic demonstration case.

PROPOSED SOLUTION

Read evidence and check institution, campus, period and historical intake.

HOW IT ADDRESSES THE PROBLEM

Show the original page, the discrepancy and the exact evidence needed.

INNOVATION AND UNIQUENESS

Preview a correction's impact before acceptance. Tie earlier reviews to their evidence versions.

Content result, source verification and human review stay separate.

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Methodology and process

1 Upload
PDF or image

→

2 Extract
PDF text / local OCR

→

3 Evaluate
12 explicit checks

→

4 Review
Clarification request

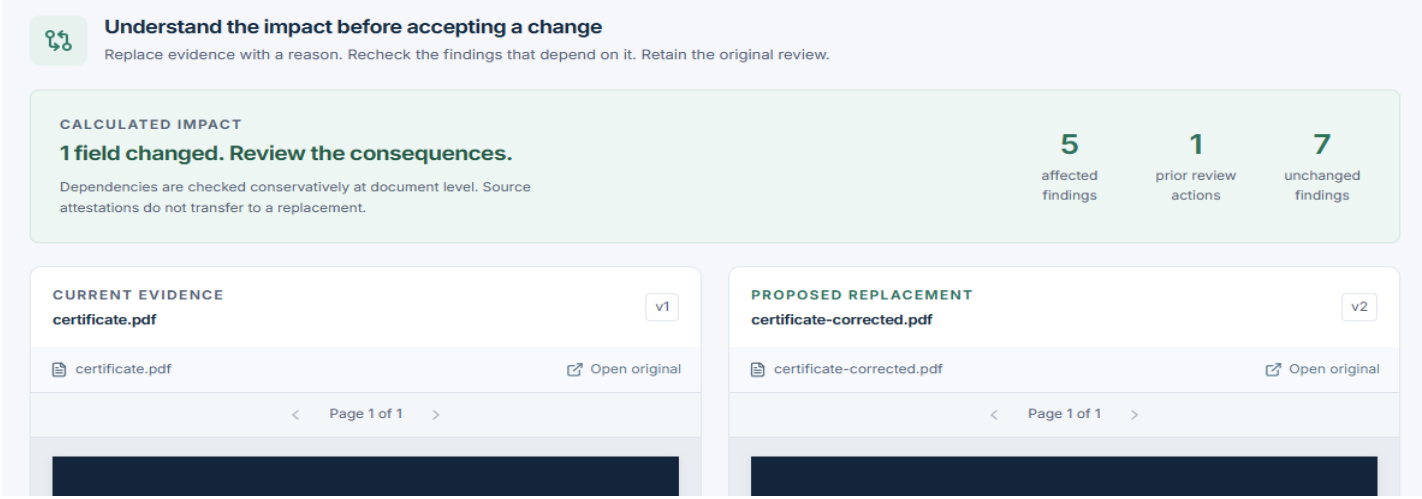

→

5 Correct
Impact and re-review

Technologies used

Layer	Implementation
Interface	React + TypeScript
API	Node.js + Express
Evidence	SQLite + private files
Extraction	pdf-parse + Tesseract
Reports	jsPDF

Working prototype: calculated replacement impact

Versions and finding fingerprints preserve review history.

OUTLAWS

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

A working local prototype with tested review controls

40 **API and rule tests passed**

12 **Synthetic PDF cases matched expected results**

Build and protected browser journey passed. No cloud key is required for the local demo.

Challenge / risk	Response / pilot action
Unreadable or ambiguous evidence	Keep results unresolved and show original evidence.
Evidence changes after review	Bind reviews to versions. Reject stale previews.
Issuer access or source outage	Label simulations and route unavailable sources to follow-up.
Rules across document formats	Validate rules and formats with domain reviewers.

Synthetic tests demonstrate behavior. Live issuer integration and signature validation remain pilot work.

IMPACT AND BENEFITS

Clearer corrections and accountable review

FOR REVIEWERS

Identify which findings depend on changed evidence.
Keep unaffected review context visible.

FOR INSTITUTIONS

Receive a precise evidence request and a controlled way to propose a replacement.

FOR ACCOUNTABILITY

Retain original files, review reasons and versions.
Keep unresolved verification visible in the report.

Illustration of the intended review experience

Pilot measures: review time, correction cycles and unsupported acceptance.

RESEARCH AND REFERENCES

SMART INDIA HACKATHON 2026

The opportunity is the connected scrutiny workflow

Research finding	Our design response
Instabase supports packet validation	Check applicability for the selected institution, campus and period.
Diligent supports evidence review	Make the requested correction specific to the finding and document.
Kloom advertises evidence re-evaluation	Show replacement impact and preserve review validity in the institutional case.
Official sources have access boundaries	Keep source coverage, outages and simulation explicit.

Our contribution: applicable evidence, precise clarification and correction impact in one working review journey

Public research identifies an implementation opportunity. It does not establish worldwide novelty.
